

WHAT IS THE WMA INTEGRATED DATA & TOOLS CATALOG?

PREMISE

The catalog is a central hub for sharing and discovering WMA project data, tools and use cases for data management, planning and technical decision making.

FOUNDATION

The catalog is comprised of 3 resource types:

- **Datasets:** observed & modeled data.
- **Tools:** software & workflows
- **Use Cases:** demos of datasets & tools

PURPOSE

The catalog simplifies finding project information or high-value data, such as datasets in development, similar data projects, and tools for tasks like aggregating data to HUC12 units.

OTHER BENEFITS

The catalog helps you discover resources, share your work, streamline data, and collaborate more effectively within the WMA community.

WHY CONTRIBUTE TO THE WMA INTEGRATED DATA & TOOLS CATALOG?

SAVE TIME

By providing easy access to valuable content, the catalog fosters efficient coordination and decreases the need for time-consuming meetings.

CONNECTIONS

The catalog offers a framework for organizing and linking project deliverables in one place, including proposed or in development products.

COMMUNICATION

Communicate development plans, release dates, and collaborate to prevent redundant work.

EXAMPLES

The catalog provides a flexible way for you to create use cases that explain how to best utilize your data and tools.

SEARCH & FILTER

The search and filter capabilities allow users to easily discover and access relevant data, tools and use cases.

HOW TO CONTRIBUTE TO THE WMA INTEGRATED DATA & TOOLS CATALOG?

CONTACT THE TEAM

Contributing is easy. Send us a message on [Teams](#), and we'll guide you through the process.

CATALOG-INTAKE

This [gitlab repo](#) has walkthroughs on how to create, edit and add metadata to the Catalog, including details on how to use the submission form.

SUBMISSION FORMS

If you've already reviewed the catalog-intake repo, submit your data, tools and use cases using our [self-validating forms](#) for easy metadata creation.

USER SUGGESTIONS

Know of a dataset, tool or use case that isn't in the catalog but should be? See an error that needs fixing? Want to suggest a UI update? Let us know [here](#).
